## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-51 and 89-108, drawn to a cementing plug for use in a cementing **casing** in a well, a method for wiping the inner surface of a **casing**, and a method for cementing a **casing** classified in class 166, subclass 192.
- II. Claims 52, 54-57, 62, 64, 67-69, 80, 82, 84, 86-88, 109-112 and 114-141, drawn to a method for wiping an inner surface of a **tubular member**, a device for wiping an inner surface of a **tubular member**, and a plug for wiping an inner surface of a **tubular member** classified in class 15, subclass 1 or 88.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as in situations merely for wiping an inner surface of a tubular member which is found in the cleaning art. Invention I has separate utility in situations for a casing which is directed to the well art. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3671

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
